Summary

Frontend Developer with production experience building responsive, data-heavy web applications in ReactJS, Next.js, and TypeScript. Delivered an HRMS workforce platform, an animation-rich product frontend, and GoHighLevel client applications at Relu Consultancy. Strong in reusable component architecture, REST API integration, state management, and performance optimization.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, Java, C++

Frontend: ReactJS, Next.js (App Router), Redux Toolkit, TanStack React Query, React Router, React Hook Form, Tailwind CSS, shadcn/ui, Radix UI, Framer Motion, GSAP, Responsive Web Design

Backend and Data: NodeJS, ExpressJS, RESTful APIs, JWT Authentication, Role-Based Access Control, MongoDB, Mongoose, Firebase

Tools and Platforms: Vite, GoHighLevel (GHL), Recharts, Leaflet, jsPDF, Git, GitHub, Postman, Chrome DevTools, Agile / Scrum, Code Reviews

Core CS: Data Structures and Algorithms, OOP, DBMS

Professional Experience

Frontend Developer Intern

May 2026 - Present

Relu Consultancy Pvt. Ltd.

Remote

- Built **SecureHRMS**, a workforce-management platform in ReactJS and TypeScript covering employee records, attendance, payroll, compliance, and task allocation, with Leaflet location tracking and jsPDF report generation.
- Developed **AI Social Automate**, an animation-rich Next.js 14 (App Router) product frontend using GSAP, Framer Motion, and Lenis, backed by Firebase services.
- Built and maintained **GoHighLevel (GHL) client web applications**, shipping 3+ internal dashboards and reporting modules used daily across departments.
- Developed a reusable library of 15+ accessible UI components with shadcn/ui, Radix UI, and Tailwind CSS, cutting new-page development time by roughly 20%.
- Integrated 10+ REST endpoints with TanStack React Query, implemented JWT authentication with role-based access control, and resolved 15+ production issues in two-week Agile sprints using Git/GitHub.

Projects

Sambaad Mart - E-Commerce Platform with Seller Portal | MERN Stack

Feb 2026

- Built a full-stack e-commerce platform with dynamic product listings, category filters, cart, and order management, covering the complete buyer flow from browse to checkout.
- Developed a seller portal with JWT authentication, product CRUD, and order tracking. Live: sambaad-mart-gqe6.vercel.app | Code: github.com/Kamal9890/Sambaad-Mart

Instagram Clone - Social Media Application | MERN Stack

Oct 2025

- Built a full-stack social media application with user authentication, posts, likes, comments, and a follow/unfollow system.
- Secured authentication using JWT and Bcrypt password hashing, and managed global state across components with Redux Toolkit.
- Designed a responsive React interface and implemented a RESTful backend with NodeJS, ExpressJS, and MongoDB. Code: github.com/Kamal9890/insta-clone

Education

Master of Technology (M.Tech) in Computer Science and Engineering

2023 - 2025

Technocrats Institute of Technology, Bhopal

CGPA: 7.82

Bachelor of Engineering (B.E.) in Computer Science and Engineering (Lateral Entry)

2020 - 2023

University Institute of Technology, Barkatullah University, Bhopal

CGPA: 8.12

Diploma in Computer Hardware and Maintenance

2017 - 2020

Government Polytechnic College, Rewa

CGPA: 7.49

Certifications

- Full Stack Developer - Job Ready Cohort**, Sheryians Coding School, 2025. Six-month intensive full-time program covering end-to-end web development, from responsive frontend interfaces to REST APIs, databases, and deployment.
- MERN Stack Certification**, Sheryians Coding School, 2025. Hands-on project work building full-stack applications with ReactJS, NodeJS, ExpressJS, MongoDB, and Redux Toolkit. Covered component-based UI architecture, client-side routing, REST API design with Express middleware, Mongoose schema modelling and CRUD operations, and JWT authentication with Bcrypt password hashing.
